

Microsoft Teams’s video conference tool has real-time speech-to-text captioning and integrates with Microsoft Stream, which is MS’s video steaming platform and also has speech-to-text. All video meetings recorded in MS Teams will automatically be shared to Stream, so all you need to do is to turn on the “Autogenerate a caption file” option for the viewers.

### **Real-time speech-to-text captioning:**

# Stream's automated captioning:

Sign into your [Stream account](#) and find the video:
