FACILITIES AND SAFETY

Facilities has been busy with the Bookstore remodel. This has taken up a great deal of Matt's time as of lately with planning and prepping. The project is on schedule. Parriman Construction has completed their part of the project. We are now on to Painting. Matt has finished the under window cabinet. The raising of the duct work is complete and the ceiling grid work. The flooring should be in next week. We are looking good for being completed by August 1st. Facilities has also been busy with installing all new chairs in the Donaldson campus and moving some good chairs over to the Airport Campus to be used. We have been doing some landscaping at the Airport campus and painting. Matt is working on the Lightboard Recording Studio project and another project for the Dean in D119 right now. The Safety and Security Committee has been quiet over the last month. We do need to get together and start planning some needed upcoming training to provide for the campus this Fall.
