Total	15				

****Students must earn a C- or better in order to successfully complete a course.***

Career outlook: The Accounting Technology AAS degree prepares students to enter the business world – as bookkeepers, as accounting techs, or as accountants. Graduates of the Accounting certificate and degree learn skills readying them to be accounting technicians with private, government, or not for profit agencies.

Advising Notes: This program is designed for students to start in the fall semester. Students that begin with Helena College in a spring semester will need to work with their advisor to adjust the pathway based on course schedules. It is important that students take both ACTG 101 Accounting Procedures I and BGEN 105 Intro to Business in the fall semester so they can progress through the accounting and business courses without delay. This degree is offered in a fully online and hyflex format. Several courses required for this degree are offered in the summer. The Bookkeeping CAS is a stackable credential that all students will earn if completing the AAS. Students can transfer their AAS degree toward earning a Bachelor of Applied Science at Montana Technological University.
